PRINT SCALE CHECK / US LETTER

Actual Size Print Test

A one-page calibration sheet for checking PDF output at 100% scale.

Before you print

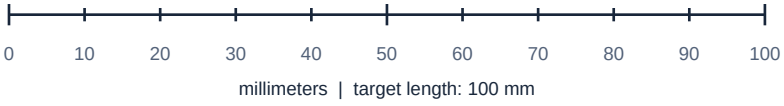

Choose US Letter paper, then select Actual size or 100%. Turn off Fit, Shrink, and custom scaling.
Check Printer Properties or Preferences for a second scaling setting.

1-inch square

Measure both sides with a ruler.
Each side should be 1 in (25.4 mm).

100 mm reference line

millimeters | target length: 100 mm

Read the result

If a line is short or long, check scaling in both the app and printer driver.
This sheet checks scale; it cannot confirm edge margins or every printer's behavior.
For a pattern or template, also measure its own reference mark after printing.
